

MODIFYING RSS FILE IN NOTEPAD

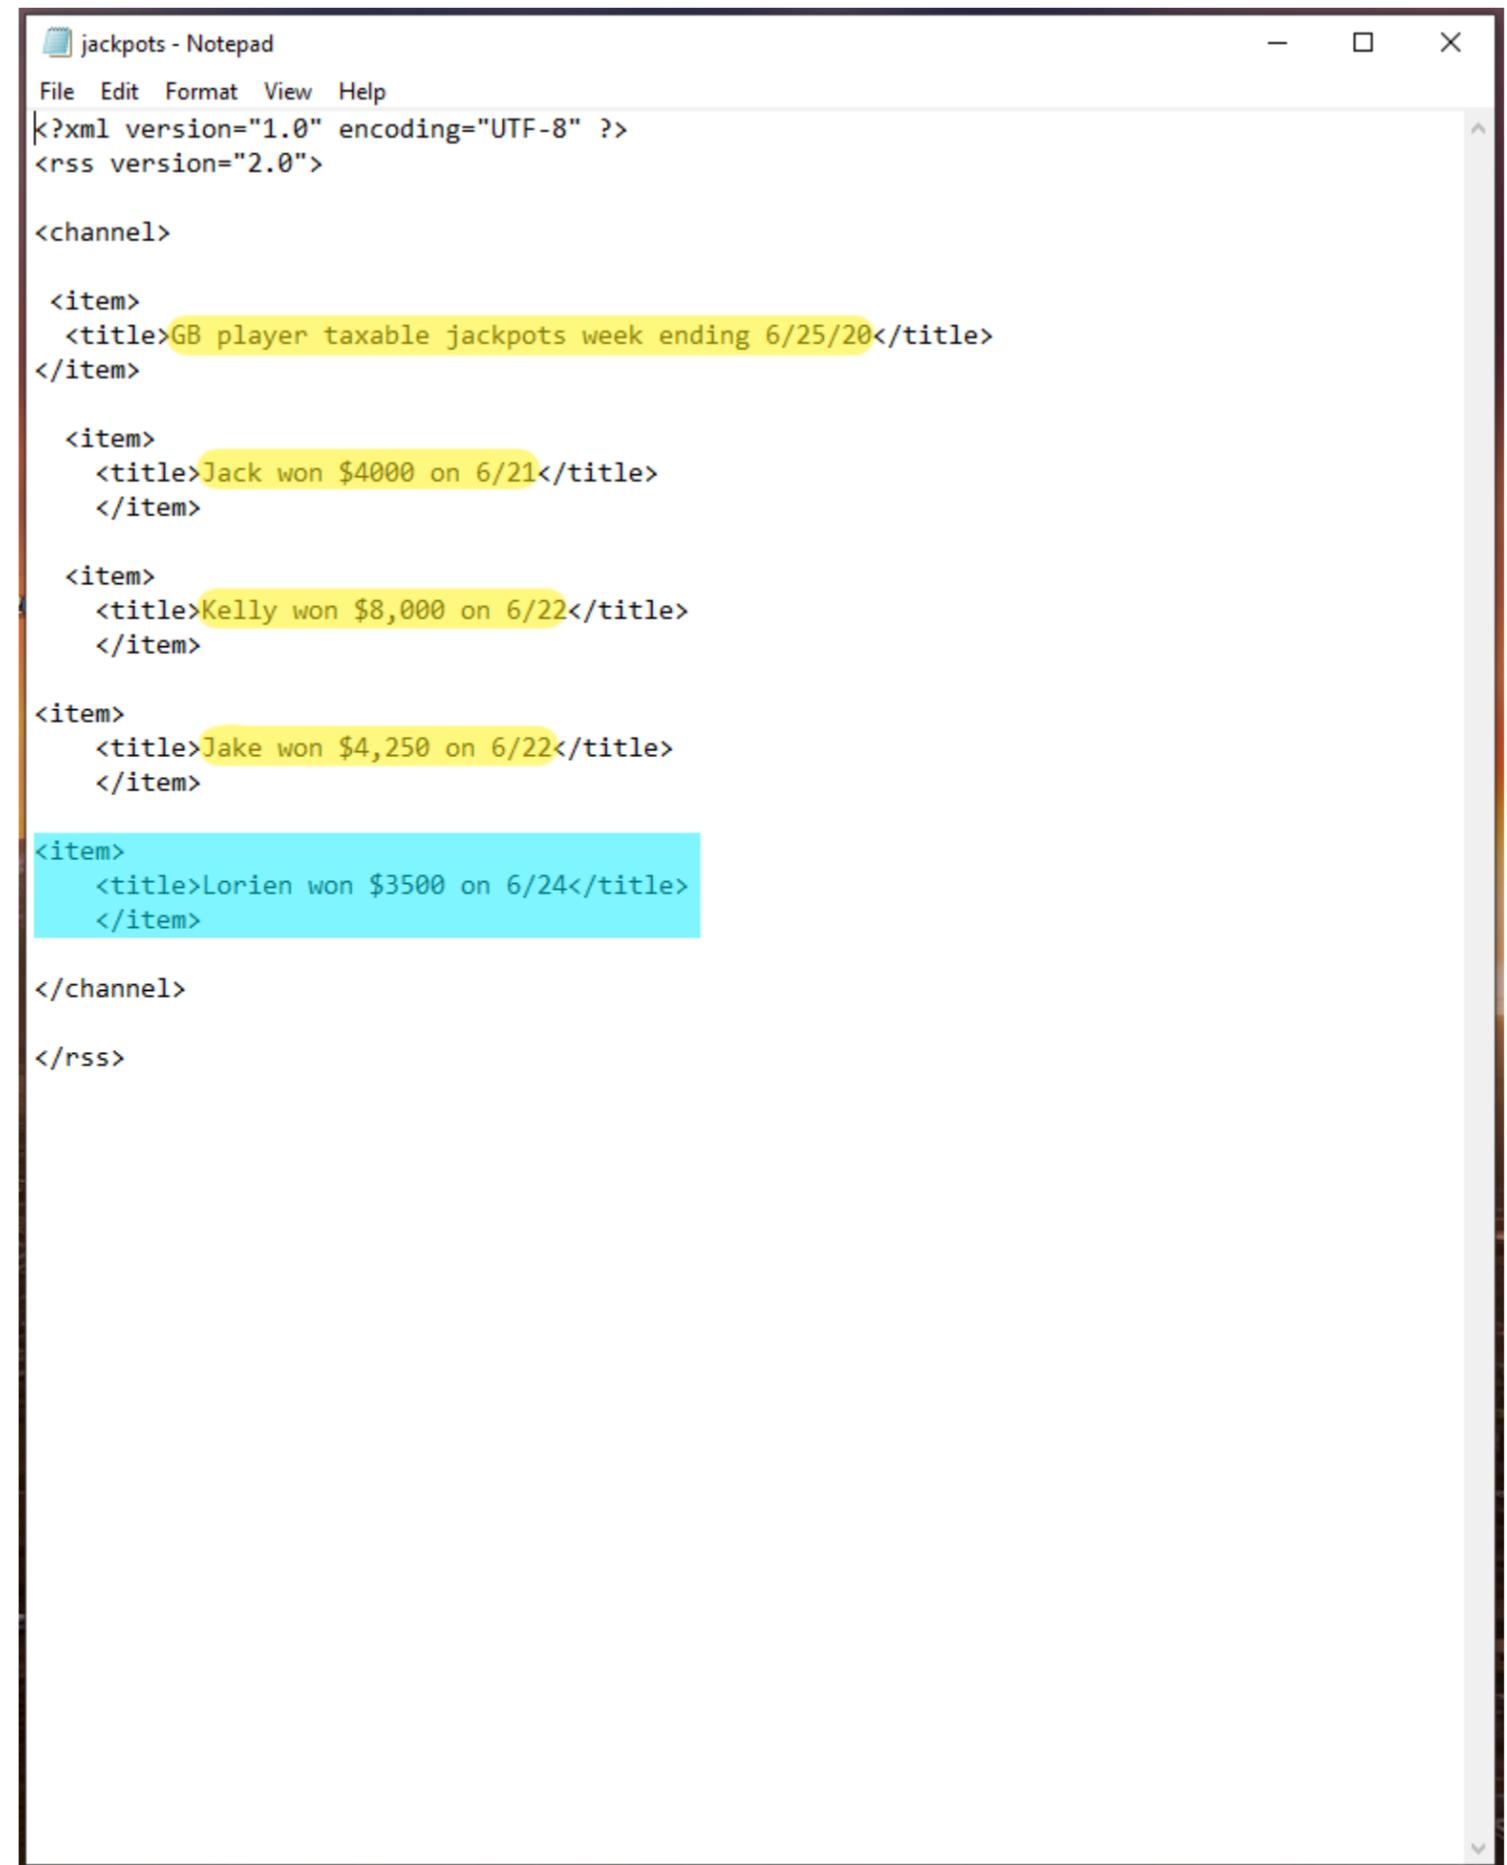

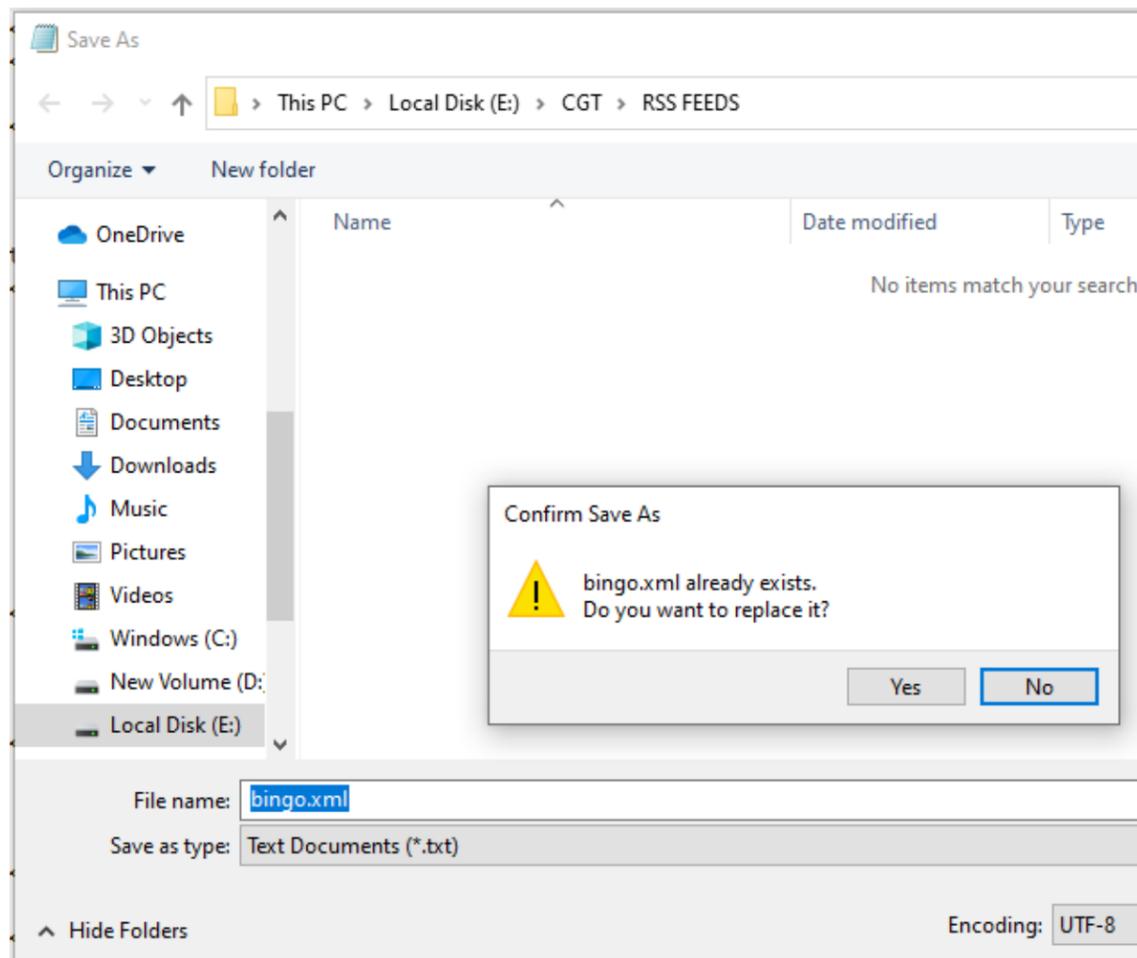

1. Open Notepad and open the rss file.

The only text that should be changed is what is highlighted in yellow. Just be careful to not delete or move the brackets in <title> </title>.

2. To add additional lines just copy the entire code in blue <item>.....</item> and paste it below the last one and above the </channel> tag.

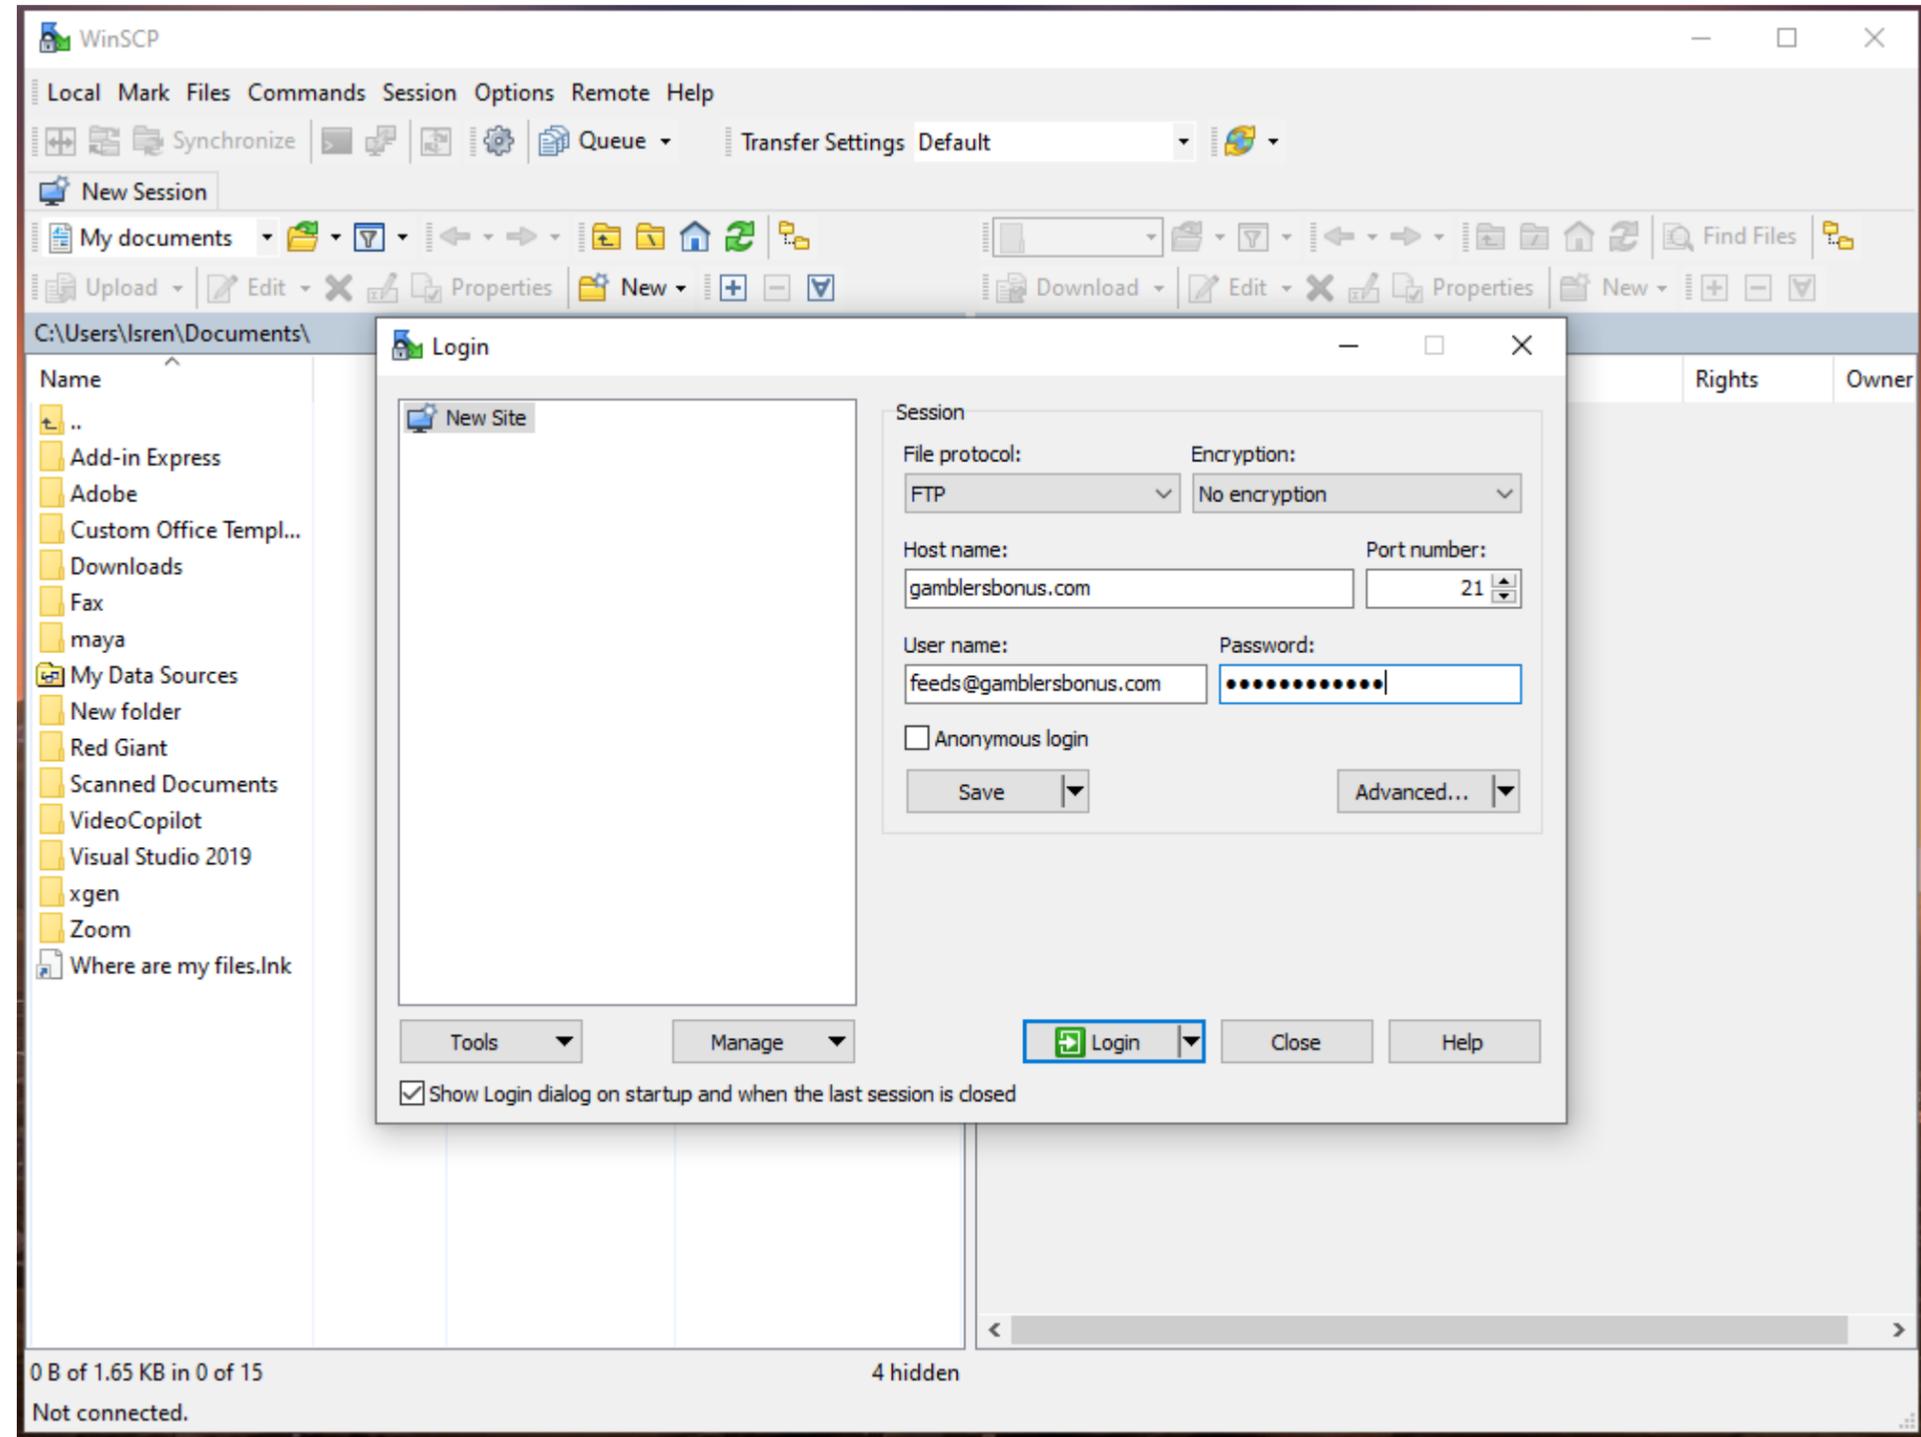

3. When you save the file DO NOT change the file name.

It needs to stay the same. The extension NEEDS to be .xml see below.

UPLOADING TO THE SERVER

1. Open WinSCP and you will get a blank login screen.
Add the login info.
Make sure to change the port number, by default I believe it is set to 22, it should be 21.

UPLOADING TO THE SERVER

2. Once you are logged in you will see the server folder for feeds@gamblersbonus.com. There are files for the bingo and jackpot feeds. You DO NOT need to delete them.

Once you have modified the rss files in Notepad you just have to drag and drop the file onto the page. *Just make sure to drag them into the same pane on the right, not into any of the folders on the left.

The screenshot displays the WinSCP interface with two panes. The left pane shows the local file system at C:\Users\Isren\Documents, and the right pane shows the remote file system at /.
